September 30, 2022

Good afternoon

We had a wonderful party yesterday celebrating six residents who had birthdays this month. Everyone enjoyed refreshments including cake as we sang along to a talented keyboardist crooner. 

Starting today rapid testing will no longer be required for visitors. However, we strongly recommend that everyone continue to do the tests and we will gladly supply them at our reception. Please remember that this is only a minor inconvenience, takes just a few minutes and is another effective layer of protection for our residents and staff. In the past few months rapid tests identified a couple of visitors who had no symptoms but had the COVID virus and could have infected the resident they were to visit and others.

This new policy does not apply to employees, volunteers, students, caregivers and contractors who must continue doing rapid tests and show negative results before entering our Home. All other screening procedures remain (temperature checks and completed attestation forms) as well as all other rules including masking and safe distancing.

We truly appreciate everyone's cooperation with helping to keep our residents from having to deal with outbreak lockdowns or worse.

Take care and enjoy the few remaining autumn weekends.

Jon Grayson
